

Supplier Contract Optimisation PROPOSITION

For 30+ years, SRM has helped clients maximise value from supplier relationships. This means unlocking cost savings and revenue enhancement opportunities via strategic supplier sourcing, contract assessment, contract negotiation, and ongoing value tracking. Our expertise spans card schemes, acquiring, payment processing, and technology solutions like core processing platforms and digital banking solutions.

The work we do yields considerable savings, reduces staffing risks, and allows clients to reinvest savings and incentives into strategic endeavours.

And SRM is typically paid on a performance basis, reducing upfront costs of engaging compared to other advisory firms.

SRM's Contract Optimisation Approach:

- Review existing contracts to identify opportunity to improve
- Compare terms with SRM's proprietary global benchmarks
- Negotiate new contracts and deliver savings
- Track and report ongoing savings throughout the lifecycle of all monitored contracts
